PÖTTINGER Operating Terminals

EUROPROFI 5510 D COMBILINE

AEROSEM 3002 ADD

SELECT CONTROL / DIRECT CONTROL

Exceptional operating convenience

These operator terminals provide the tractor driver with a well-deserved level of support to ensure efficient and consistent productivity. PÖTTINGER's new generation of in-cab terminals make sure you have everything under control, even after a long day in the field. The development of the terminal focussed on maximum operating convenience, ergonomics and automation of each working step. The result is a range of control systems to ideally match your equipment, from electronic preselect controls through to fully integrated ISOBUS terminals.

Tough and illuminated – for 24-hour operations

- Heavy-duty 2-component synthetic casing with rubber edge guard
- All units feature illuminated graphic display
- Raised back-lit keys for optimum visibility at night

Illuminated display and back-lit keys on all terminals

SELECT CONTROL / COMPASS CONTROL

The robust electronic preselect SELECT CONTROL terminal features an illuminated graphic display and back-lit keys. The nine function keys are therefore clearly visible at night. All functions of the equipment to be operated can be preselected using the SELECT CONTROL and then performed using the tractor's remote valves. Lanyards are no longer needed. As a result, SELECT CONTROL monitors the status of the machine and prevents malfunctions and damage.

- Operating hours counter for a perfect record of all activities in the field
- Wagon full signal with load counter

A new on-board computer has been developed for VITASEM seed drills - COMPASS CONTROL. The following functions can be performed conveniently and easily: electronic tram-line system, calibration assistant, hectare counter and speed display.

SELECT CONTROL makes things easier with:

- NOVACAT X8
- TOP 852 C s-line and TOP 972 C s-line (optional)
- EUROBOSS
- VITASEM, AEROSEM (as COMPASS CONTROL)

Select Control

Compass Control

/ POWER CONTROL

DIRECT CONTROL

The electronic DIRECT CONTROL system has been developed especially for PÖTTINGER's wide range of loader wagons. All functions can be selected directly without having to change between the loading and unloading menus. The brightness of the graphic display and illuminated keys is adjustable.

- The loading chamber lights and external floodlights can be controlled.
- Wagon full signal with load counter
- Scraper floor switch at tailgate (optional)
- 2-speed motor directly selectable
- Steered axle directly selectable
- Load-Sensing-compatible

DIRECT CONTROL makes things easier with:

- EUROBOSS (optional)
- PRIMO / FARO / EUROPFI

Direct Control

WIRELESS POWER CONTROL / POWER CONTROL

POWER CONTROL is the new standard on all ISOBUS-compatible PÖTTINGER machines. A total of 23 keys offer the highest level of convenience for operating PÖTTINGER machines. PÖTTINGER has extended the functionality of the POWER CONTROL terminal to provide more flexible operation of loader wagons. WIRELESS POWER CONTROL enables convenient operation of the loader wagon from outside the tractor cab as well. Now you can optimise unloading using the cross conveyor belt, for example. The operator terminal can be attached to a carrying belt, so the driver has both hands free to work.

An extended range of up to 328' / 100 m ensures a reliable connection between the tractor, machine and operator terminal. Thanks to intelligent loader management, the WIRELESS POWER CONTROL provides reliable support to farmers even during long deployment in the field.

POWER CONTROL makes things easier with:

- NOVACAT X8 collector (without collector optional)
- NOVACAT V10
- TOP 1252 C s-line (optional)
- TORRO / JUMBO / JUMBO combiline
- all loader wagons with beaters (without beaters optional)
- TERRASEM (as ARTIS / ARTIS plus)
- VITASEM, AROSEM (with electric metering)

Wireless Power control

NEW!

CCI 100

ISOBUS Terminal CCI 100

ISOBUS is the worldwide standard for the communication between tractors and machinery, as well as the transfer of data between these mobile systems and agricultural office software. The new PÖTTINGER CCI 100 ISOBUS terminal not only offers all the functions provided by the POWER CONTROL terminal, but also enables professional operation of all ISOBUS-compatible machines from a wide range of manufacturers.

- Rugged synthetic casing
- High quality 8.4" TFT colour touch-screen
- Six soft keys on left and right (F1-F12)
- Ambient light sensor and back-lit function keys
- Edit using keys and touch-screen
- Video input for camera
- Scroll wheel with confirmation function for direct input and adjustment of setpoints

PÖTTINGER CCI 100 makes things easier with:

- NOVACAT X8
- NOVACAT X8 collector
- NOVACAT V10
- all loader wagons (EUROBOSS and above)
- TOP 1252 C s-line
- VITASEM, AEROSEM (with electric metering)
- TERRASEM
